RE: Response to Inspection Report
Insurer: Farmers
Claim #: 7007986837-1

To Whom It May Concern:

First, we wanted to thank Commence Department of MN for taking time to investigate the complaint and giving us the next steps to take. Secondly, we wanted to thank the City of Eden Prairie for compiling the list of houses in our neighborhood that have exterior work done in the last two years; so, we don't need to knock on everyone's door, saving us lots of time in this cold winter:

- We knocked the doors of over 40 neighbors from Tuesday (2/4) to Friday (2/7) evenings.
- We were able to talk to 19 of them.
- Among 19 homeowners in the neighborhood, 14 of them confirmed that their work were due to hail damage. Some of the claims were for the storms occurred in 2024 and others in 2023 (please refer to the second and third page of this letter for details).
    - There were hailstorms in our neighborhood in 2024 and 2023.

Weather data from various sites provide valuable reference but they can't track every hailstorm occurs at every specific location. Even the most advanced AI technology can't do it. As above shows, there were multiple hailstorms in our neighborhood in 2023 and 2024 and caused damages to roofs, sidings, and windows.

The dents observed in our property are all from hails. We have been with Farmers since we purchased the property in 2014 and made hail claims in 2015 and 2020:

- There were no dents observed during 2015's hail claim inspection.
- The only dents found in 2020 were for 2 sashes as showing at the inspection report from 2020 hail claim.
- All other dents are newer therefore they can't come from the installation of the windows or at the time of construction of the home.
- We are living in a very safe neighborhood, The cause of the dents can only be the hailstorm.

Please review these new facts and re-open the claim.

Regards
