Dear Paul Weig,

Thank you for your correspondence dated July 2, 2025, regarding the above referenced claim. In this inquiry, Mr. Lu expressed dissatisfaction with the denial of coverage for his claim. We appreciate the opportunity to review this matter and respond.

We respectfully maintain that the coverage determination for Mr. Lu's claim is appropriate and supported. On August 13, 2024, a claim was filed for damages due to hail for Mr. Lu's property. Upon review the photos obtained during an inspection conducted by Hancock Claims Consultants on August 29, 2024, it was determined that there was no exterior damage created by wind or hail to the windows for Mr. Lu's home. There was no opening created by the direct force of wind or hail allowing water to enter into the home and cause damages. As Mr. Lu had sent his own photos and was in disagreement with the decision of no coverage for the damages to the windows, the services of an engineer were enlisted to inspect the residence. The engineer inspection occurred on October 9, 2024, and the report of the findings was received and reviewed on November 4, 2024. The report confirmed that the damages to Mr. Lu's windows were unrelated to wind or hail or other storm related causes. The stains were noted to be caused by condensation or leakage through the windows which was related to long term aging and deterioration to the units. Therefore, as wear and tear are not a covered cause of loss under the policy, we are unable to afford coverage for the damages to Mr. Lu's windows.

We value Mr. Lu as a customer and appreciate his business. Regrettably, we do not have a more favorable response. Should Mr. Lu have additional questions, we encourage him to
